EDUCATION

Drexel University

Bachelor of Science in Computer Science

Philadelphia, PA

May 2026

Relevant Coursework: Data Structures & Algorithms, Advanced Programming, Computing & Informatics Design

WORK EXPERIENCE

Amazon Web Services

New York, NY

Software Development Engineer Intern

June 2025- August 2025

- Built a full-stack LLM-powered internal tool that allowed users to query complex financial data in natural language and generate visualizations from the results.
- Integrated frontend workflows with AWS services and APIs to make fragmented data easier to search, interpret, and act on through a single interface.
- Improved the usefulness of generated outputs by experimenting with multi-shot prompting, self-refinement, and structured response patterns for more accurate data interpretation.

Amazon Web Services

New York, NY

Software Development Engineer Intern

June 2023- September 2023

- Designed and implemented an API to extract customer journey data and expose workflow insights for internal teams.
- Built a React/AWS Cloudscape interface that helped users query, visualize, and analyze customer behavior across product workflows.
- Integrated the API into an internal analytics tool, improving user experience analysis by 25% and helping teams better understand operational bottlenecks.

PowerPay

Philadelphia, PA

Full-Stack Developer Intern

March 2024- June 2024

- Built secure full-stack fintech features using Next.js, Node.js, Plaid, and AWS Lambda across frontend flows, API routes, and backend data handling.
- Implemented validation, error handling, and secure data processing for sensitive financial information.
- Improved customer-facing product functionality while working in a startup environment with fast-changing requirements.

PROJECTS

Reech — Founder & Full-Stack Engineer

Philadelphia, PA

Flutter, Dart, PostgreSQL, Supabase, SQLite, AI/ML

Present

- Built a production-grade mobile fitness app with authentication, PostgreSQL-backed data modeling, offline-first workout logging, local persistence, and cloud sync.
- Designed sync flows and conflict-handling logic to keep user activity reliable across poor connectivity, local storage, and cloud updates while owning product decisions across mobile UX, backend architecture, and database reliability.

Xploit — Co-Founder & Full-Stack AI Engineer

Philadelphia, PA

Pydantic-AI, React, TypeScript, SQLite, WebSockets, FastAPI

Present

- Building an AI security platform that turns red-teaming into a live capture-the-flag-style simulation, running automated Attacker Agents against task-specific Victim Agents to test whether AI systems can be jailbroken into prohibited actions.
- Engineered a FastAPI and Pydantic-AI backend with WebSocket-based live updates to stream attacks as they happen.

TECHNICAL SKILLS & INTERESTS

Programming Languages: Java, JavaScript, TypeScript, Python, Dart, C

Full-Stack: React.js, Next.js, Flutter, Node.js, REST APIs

Cloud Infrastructure: Docker, AWS, Supabase, SQLite/PostgreSQL

AI & ML: LLMs, OpenCV, MediaPipe, Hugging Face

Testing & Tools: Jest, Cypress, JUnit, Postman, Git/GitHub

Interests: AI safety, local LLMs, indie hacking, soccer
